A- Passage 1

(10 marks)

Read the following passage ,then answer the questions below:-

Once upon a time there was a little bear whose name was Nutbrown . He walked in the forest for a long time . He got tired , so he decided to rest . He saw an enormous den . He went inside . He fell asleep on a chair . The den was a school .

While Nutbrown was sleeping the principal came in to see what the school need. In the classroom , the principal found one broken desk and two missing light bulbs . In the computer lab , she found that the printer is empty of paper . She went to the library and saw that all books were arranged neatly on the shelves . Finally she went to the reception area . As she pushed the door open , her cell phone rang : Do di do di do di doooooo. She answered the phone . Nutbrown opened his eye . He growled and fell off the chair . When the principal saw him she shouted AHHHAHAHA a bear !! and the Nutbrown was very scared and shouted AAHHHHH . Both of them ran away .

B- Passage 2

(10 marks)

Read the following passage, then answer the questions below:

The colour ink cartridge of your printer has three colours. **They** are red, blue and yellow. Red, blue and yellow are the primary colours of ink. Two primary colours make a secondary colour. For example, red and yellow make orange. The other secondary colours are green and violet. We can make black with red, yellow and blue.

The correct name for a colour monitor is an RGB monitor. RGB means *red, green, blue*. Your monitor can make red light, green light or blue light. Red, blue and green are the primary colours of light. Two primary colours make a secondary colour. For instance, red and green make yellow . The other secondary colours are magenta and cyan. White light has all the colours of the **rainbow** . It has 7 colours .We can make white light with red, green and blue.
